EDUCATION

UNIVERSITY OF BATANGAS – BATANGAS CAMPUS Batangas City
BS Computer Engineering 2026
Major in Software Engineering · Focus in Computer Hardware & Systems
Relevant Coursework: Data Structures & Algorithms, Software Engineering, Operating Systems, Database Systems, Web & Mobile Development, Computer Architecture & Organization

WORK EXPERIENCE

DIGISCRIBE TRANSCRIPTION CORP. (OJT) Batangas City
Website Development Leader June 2025 – Sept 2025

- Developed and deployed a responsive company website using HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS, showcasing Digiscribe's services, company background, and previous projects.
- Implemented an online quotation request feature and optimized the UI/UX for accessibility, responsive design, and streamlined client navigation.
- Contributed an increase in client inquiries by providing an accessible online platform for potential clients to explore services and request quotations.

IT Hardware & Technical Support

- Assembled, upgraded, and repaired desktop computers, including component installation, cable management, and hardware troubleshooting.
- Configured and maintained PCs through operating system installation, storage partitioning, driver setup, and system configuration.
- Set up and reconfigured LAN cable connections, ensuring proper network connectivity and organized cable management for workstations.

VICMAR HOMES Batangas City
Web Developer June 2025 – Sept 2025

- Redesigned and optimized the website UI/UX to improve navigation, accessibility, and ease of use for potential home buyers.
- Developed an interactive house listing system with budget-based property browsing and an integrated vicinity map, helping users find suitable available units and their locations.
- Implemented a quotation and inquiry system that enabled prospective buyers to request home quotations directly through the website, generating 4 quotation inquiries within the first month of publication.

PROJECTS

IOT SMART WATER PIPELINE MONITORING SYSTEM (Web App) 2025-2026

- Engineered an IoT-enabled pipeline monitoring system using an ESP32 and yf-b7 water sensors to detect and identify simulated pipeline leaks in real time.
- Developed an interactive web monitoring dashboard using JSX, JavaScript, and CSS for real-time visualization of sensor data and system status.
- Programmed the leak detection and alert mechanism in Python, integrating automated dashboard updates and SMS notifications for immediate leak reporting.
- Integrated a solar-powered energy system consisting of a 6V solar panel, charge controller, dual 3.7V batteries, and boost converter, and validated system performance through multi-location leak simulations.

ADDITIONAL

Technical Skills: JavaScript/TypeScript, React, Node.js, HTML/CSS, Git/GitHub, VS Code, Python, Java, MySQL, PC Configuration & Troubleshooting, UI/UX Design, Basic Cybersecurity
Professional Skills: Problem-Solving, Technical Debugging, Team Collaboration, Communication, Time Management
Certifications: Cisco Certification JavaScript Essentials, Python Programming Certification, Software Engineering Certification, CCNA: Enterprise Networking, Security, and Automation, CCNA: Switching, Routing, and Wireless Essentials
